PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building and maintaining Java microservices using Spring Boot, REST APIs, and React.js. Experienced across the full delivery cycle including API design, relational database integration with PostgreSQL and MySQL, containerisation with Docker, and version control with Git. B.Sc. Computer Science graduate (CGPA 8.08) currently developing and deploying backend services in a product engineering team. Seeking a Software Engineer role where I can apply strong problem-solving ability and full stack development skills to build reliable, production-grade applications.

TECHNICAL SKILLS

Languages: Java, Python, C, SQL

Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices

Frontend: React.js, JavaScript, HTML5, CSS3, Bootstrap

Databases: PostgreSQL, MySQL

DevOps and Tools: Docker, Jenkins, Git, GitHub, CI/CD, Postman, Maven, Jira

Environments: Eclipse, VS Code, Linux (Ubuntu), Windows, Render.com

PROFESSIONAL EXPERIENCE

Trainee Software Engineer | Trinesis Technologies Pvt. Ltd.

Pune, Maharashtra | April 2026 - Present

- Develop and maintain RESTful APIs for Java microservices built with Spring Boot, supporting backend functionality for production applications.
- Integrate backend services with PostgreSQL and MySQL databases using Spring Data JPA and Hibernate, writing and optimising queries for data-intensive operations.
- Participate in the full development cycle for microservice features, covering design, implementation, testing, and debugging.
- Test and validate API endpoints using Postman, diagnosing and resolving reported defects across the request chain.
- Collaborate with team members using Git for version control, following established coding standards to produce clean, maintainable, and reusable Java code.

PROJECTS

Smart Coaching and Training Planner | Cravita Technology

Pune, Maharashtra | Full Stack Web Application | Live: cravita-frontend-of-task.onrender.com

- Built an end-to-end web application for managing coaching and training schedules, using a Spring Boot backend, React.js frontend, and MySQL database.
- Designed and implemented REST APIs connecting the frontend and backend, handling scheduling, user management, and data persistence.
- Containerised the application using a multi-stage Docker build with a non-root runtime user, reducing image size and enabling reproducible deployments across environments.
- Configured container health checks against Spring Boot Actuator endpoints so the running application reports readiness accurately to the deployment platform.
- Deployed the application to a live environment, providing real-time access to end users and streamlining the training management process.

EDUCATION

Bachelor of Science, Computer Science | Savitribai Phule Pune University

Pune, Maharashtra | 2022 - 2025 | CGPA: 8.08
